

Stay Safe Online

5 Cyber Hygiene Tips

For Everyone — No Tech Experience Required

1

Use Strong Passwords

Use a password manager or passphrase with 12+ characters mixing letters, numbers, and symbols.

2

Enable Two-Factor Auth

Add a second verification step to all important accounts — even if your password leaks, you're protected.

3

Think Before You Click

Hover over links before clicking. Phishing emails often look real — when in doubt, go directly to the site.

4

Keep Software Updated

Updates patch security vulnerabilities that attackers actively exploit. Enable auto-updates where possible.

5

Lock Your Screen

Always lock your device when stepping away — even for a moment. Use Win+L or Cmd+Ctrl+Q.
